

YASH GUPTA

Software Developer | MERN Stack Developer

manojyashgupta@gmail.com • +91 63501 35244 • github.com/Zackrip • linkedin.com/in/yash-gupta-0a99b9325

EXECUTIVE SUMMARY

B.Tech Computer Science student and MERN Stack Developer experienced in building full-stack applications with React.js, Node.js, Express.js and MongoDB. Developed role-based e-commerce, task-management, and AI-assisted automation platforms using REST APIs, JWT authentication, Redis, WebSockets, and Cloud deployment. Experienced in debugging live production systems and delivering end-to-end features.

TECHNICAL SKILLS

Languages: JavaScript, C++, SQL

Frontend: React.js, Redux, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Socket.io, Multer, Nodemailer

Databases: MongoDB, MySQL, PostgreSQL, Redis

Authentication: JWT (Access & Refresh Tokens), RBAC

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Figma

Concepts: OOP, Data Structures & Algorithms, REST API Design, Real-Time Systems

EXPERIENCE

Full Stack Web Development (MERN) Intern — Dream Soft 4u

July 2026 – Sept 2026

- Shipped production bug fixes and built TaskSync, a full-stack task management application, end-to-end while ramping up on Redis, WebSockets, and SQL.
- Diagnosed and resolved bugs in a live production codebase, delivering fixes without disrupting active users.
- Collaborated on backend architecture, database operations, and production debugging during feature development and maintenance.

PROJECTS

CarVault — Vehicle Information Platform

June 2026 – Present

- Developing a vehicle-history verification platform for buyers, dealers, and administrators with role-based modules for listings, ownership records, and dealer operations.
- Designed a MongoDB schema spanning vehicle, dealer, and user entities across 3 distinct access levels.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

X-Fashion — Social E-Commerce Platform

Feb 2026 – May 2026

- Engineered a full-stack social commerce platform with 3 role-based dashboards (User, Seller, Admin) and Instagram-style shopping reels for product discovery.
- Shipped 20+ REST API endpoints covering authentication, product catalog, orders, and seller management.
- Built an Admin Portal with seller approval workflow, product moderation, user management, and analytics.
- Secured the platform with JWT authentication and role-based access control; deployed on Vercel with MongoDB Atlas.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

Real-Time Call Tracking & Task Automation System

July 2025 – Sept 2025

- Built an AI-powered meeting assistant that extracted action items and commitments from meeting transcripts and automatically converted them into assigned tasks.
- Automated real-time monitoring and notifications using Socket.io for live call tracking.
- Automated task generation from extracted commitments, secured with JWT-based role authentication.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

MERN Task & Collaboration Platform

July 2026

- Engineered JWT access/refresh token authentication with forgot- password and reset-password flow via Nodemailer.
- Developed role-based task workflows (Creator & Assignee) with creation, assignment, status updates, and automatic overdue detection.
- Architected an event-driven, real-time notification system using WebSockets with Redis, including native desktop notifications and one-to-one chat.
- Managed global application state with Redux; handled profile image uploads via Multer.

Tech Stack: React.js, Redux, Node.js, Express.js, MongoDB, Redis, WebSockets, JWT, Nodemailer, Multer

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering

2024 – 2028

Global Institute of Technology, Jaipur

PCM with Computer Science, CBSE

2022 – 2024

Tilak Public School, Jaipur

ACHIEVEMENTS

- Designed and developed an AI-powered Real-Time Call Tracking & Task Automation System for extracting commitments and action items from meetings.
- Participated in 3 hackathons, including an Agentic AI Hackathon focused on autonomous workflow automation.
